Features of Extent Report
 · Very simple to use API
 · Beautiful and responsive UI
 · Provides dashboard for the entire run
 · Creates a single report file, so less management of artifacts required
 · Separate section for categories, provides analysis of tests by category
 · Generate PIE Chart based on test case status.
 · We can filter reports depending on status.
 · It fetches system details like OS, Java Version, and Memory and so on.
 · Attach screenshot in report that is most important feature.
 · Easily integrate test-runner logs
 · Can be customized heavily using an external config file
